

August 11, 1995

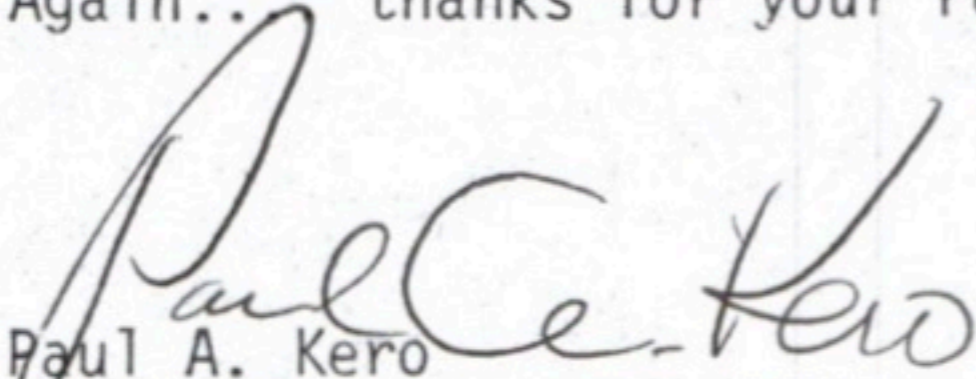

Mr. John N. Sampson  
4949 Aldrich Avenue South  
Minneapolis, MN  
55409

Dear Mr. Sampson:

With pleasure, I confirm your reception report of WEBC-AM at 560 kHz on July 6, 1995, at 6:55 p.m. CDT. It seems that we have a continual problem with interference from WIND in Chicago all around the Midwest!

To answer your question regarding the expanded AM band, WEBC still has not made a decision on whether to make the switch; right now, it appears that it may be some time before ANY station migrates into the expanded band due to the number of pending appeals and FCC rulings.

Again... thanks for your reception report!

  
Paul A. Kero  
Chief Operator, WEBC/WAVC
