Dear John,

This letter will confirm your reception of WNAM on June 4th, 1993. We appreciate your detailed report. Even using your loop antenna, it is still a pleasant surprise that you were able to pick up our signal.

WNAM is 5000 watts 24 hours a day with a pattern change at local sunset. It used to go to 1000 watts at night.

By the way, I share your hobby. I've been a DXer since 1963 as well as a ham operator. My equipment includes a Realistic DX 440, a G.E. SUPER RADIO III, and an old National NC 57 plus a Kenwood TS 520 for hamming.

Good luck..and thanks for your letter!

Ron Ross  
Program Director/Morning Announcer
