John N. Sampson
5210 Girard Av. South
Minneapolis, MN 55419

Mr. Sampson:

This will confirm your reception of WOGO 680 A.M. on 8/30/87. WOGO began broadcasting a little over two years ago from studio/transmitter facilities in Hallie, WI on the south side of Chippewa Falls. Daytime power is 2500 watts stereo. Our transmission pattern is "figure-8" shaped, with lobes extending to the northwest and southeast of Chippewa Falls. The pattern is quite tight so it's a wonder you could receive us at all in your position.

Thank you for your interest in A.M. radio broadcasting.

Sincerely,

Patrick Wahl

Apprentice Engineer
