

NBC RADIO NETWORK

Country Music 800 AM

6

Dear John,

Indeed, you have recieved WVAL's signal, only how you and other Twin Citians continue to recieve us so well is somewhat of a mystery. WVAL is a 250 watt non-directional station. Perhaps part of the answer is due to the fact that we occupy a Mexican clear channel. Perhaps along with the fact of our low broadcast frequency, this explains the unusual phenomenon of your reception. Whatever, I'm glad to hear of your listenership.

Do you have any explainitory materials on the NRC? If so, I would appreciate recieveing copys of same.

Sincerely,

Daniel P. Zimmermann
