March 30, 1973

Mr. John N. Simpson
52 Delwick Lane
New Providence
New Jersey 07974

Dear Mr. Sampson:

Many thanks for your report of reception of WOWW on March 23, 1973, from 0556, to 0558 hours EST.

At the time we were on night pattern with 500 watts. At 0600 hours we switched to day pattern with 5KW. The day pattern which is directed North West plus the daytime that occurred at 0600 hours accounts for the fact that you could not hear the signal after 0600 hours.

Best regards,

F.A. Pritchard
Chief Engineer
