December 2, 1965

Mr. John N. Sampson  
 90 Paerl Street  
 New Providence, New Jersey

....Of course you are quite right, Mr. Sampson -- I was testing the WPAZ transmitter on Monday, November 22, 1965, and your radio log corresponds with what we did from 3:21 to 3:29 a.m. that day.

Thank you for your evaluation of our signal in New Providence. You tell us it was "Fair with slight fading, heavy atmospheric noise and some interference from a Canadian station."

This letter is our confirmation of your reception. WPAZ appreciates your interest.

Cordially yours,

*Bob*
