

DELAWARE VALLEY BROADCASTING CO. • ONE SOUTH MONTGOMERY STREET • TRENTON, NEW JERSEY 08608

June 21, 1973

Mr. Sampson:

This is to verify that you did indeed receive WTNJ on June 18, 1973 between 11:58 am and 1:47 pm. WTNJ operates on 1300 KHZ at 5000 Watts daytime directional. I have no pattern maps to spare at this time but, our primary coverage is Trenton, N.J. and all of central Jersey with secondary coverage to North and South Jersey and E. Bucks County, Pa. Our antennas are 4 towers 300 feet each XMTR Gates BC5P2.

I hope this is the information you will need.

Sincerely,

Mark H. Wolinsky  
Chief Engineer  
WTNJ  
1 S. Montgomery Street  
Trenton, New Jersey 08608
