Mr. John Sampson  
52 Delwick Lane  
New Providence, New Jersey 07974

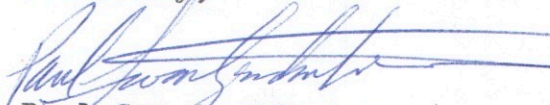

Dear John:

I would like to confirm your reception of my test transmission Monday, March 10, 1975, at 01:42 E.D.T.

You heard our main transmitter operating at 1 kw., which is how I usually have it during experimental hours. It is an R.C.A. BTA-1R. Our tower is a Lingo column-type radiator, approximately 180 ft. high.

Thanks for your interest.

Sincerely,

Paul Swartzendruber,  
Chief Engineer
