Omaha, Nebraska
U.S.A. 68124

Dear John,

This letter confirms your reception of our station on Monday, December 17, 1979 at 1:02 AM, MST.

We operate clear channel on 740 KHZ with a directional antenna (four tower) and 50 KW of power. Our pattern is essentially clover leaf, with the main lobe to the north, during the evening hours, and non-directional during the day.

Thanks for your report and good DX.

Yours truly,

Ken Anholt
