Omaha 6, Nebraska

Dear Sir:

This is your verification, finally, of reception report for KCYL's dx program Jan. 10, 2:30-3:00 am est. Sorry, I'm slow, but had 32 other reports to answer too. Thanks a lot for listening for me. Received two reports from New Zealand and two from Canada, which were very meager but gratifying. Seems as though our signal built up in more than one location around 2:36 am. Wonder what caused that? Our regular broadcast day is 6:00 am to 10:00 pm, and ~~are~~ frequency checks are taking at Austin, Texas during our daytime operation. Glad you could hear us, and thanks for the fine report. Best dx. 73.
