John Sampson
7940 Pacific
Omaha, Nebraska

Dear John,

I am pleased to confirm you reception report of Sunday, August 18, 1957, from 5:25 a.m., to 5:28 a.m., CST on 1360 kilocycles. The signal check was actually conducted from 5:25 a.m. to 5:38 a.m. CST. K D B C operates from 6:00 a.m. to sunset only, as we are a day-time station. The tone you heard was, as you believed, was a 1,000 cyclestone. I am not surprised there was interfferance from KXOL in Ft. Worth, as they also are on 1360 kilocycles.

We would appreciate any futher reports from you if and when you receive us. We run the frequency check every month on a Sunday morning, at 5:25 a.m. CST.

Sincerely yours,

Bob English
