STATION MANAGER

FREMONT, NEBRASKA

July 30, 1955

Mr. John Sampson
7940 Pacific
Omaha 6, Nebraska

Dear Sir

Thank you very much for your report of KFGT. I am pleased to verify your reception of station KFGT in Fremont, Nebr., from 9:38 A. M. and 9:48 A. M. (CST) on July 30, 1955. Your report is correct in every detail.

KFGT has been on the air for many years, beginning with the call-letters of KORN. In March of 1949, KFGT's call-letters were changed to the present ones, as the Fremont Guide and Tribune station, a local newspaper here - hence the last three letters "F-G-T". KORN had originally operated on a frequency of 1400 kcs, but in 1949, that frequency was given to a new station in Lincoln, Nebraska. So KFGT came on 1340 kcs. with a power of 100 watts. KFGT is on the air from 6 A. M. to 10 P. M. (CST) and 6 A. M. to 6 P. M. CST on Sundays. We have no scheduled frequency check; the frequency is measured during the daytime hours by KOIL in Omaha.

Our station utilizes a Collins 300A transmitter running a power of 100 watts. Only 100 watts is authorized because of the proximity of stations in Estherville, Iowa and Kearney, Nebraska on the same frequency. The antenna is a uniform cross-section, guyed, vertical radiator 182 feet high and is located a mile and a half north-east of the center of Fremont, just east of highway #275.

Again, we at KFGT want to thank you very much for your interesting report from Omaha. Let us hear from you again sometime, won't you? Best of DX.

Sincerely,

Robert L. Johnson
General Manager KFGT
