January 26, 1955

Mr. John Sampson
7940 Pacific
Omaha 6, Neb.

Dear John:

This is to verify reception of KGGF on the 13th of January, 1955.

We operate on 10,000 watts day and 5,000 watts night. At night we are directional with the main signal to the southwest and west. We have received several letters from New Zealand this winter. We and KOAM in Pittsburg, Kansas are the two most powerful stations in Kansas.

Yours truly,

Dick Embody
Program Director
