Mr. John Simpson
7940 Pacific
Omaha 6, Nebraska

Dear Sir:

Thanks for your verification of our frequency check of June 9.

In answer to your questions, KICD's 250 watt signal is non-directional, we are using a stick out here, 392 feet tall.

Our programming starts at 5:30 AM and runs until 12:05 at night.

I have had more reports from people owning the S-53-A than any other type receiver. They must be quite popular.

Thank you again for your report.

Sincerely yours

Robert F. Tuttle

Assistant Engineer KICD
