Mr. John N. Sampson
1714 South 84th Street
Omaha, NE 68124

Dear Mr. Sampson:

In reference to your recent letter:

The information you sent us is correct.

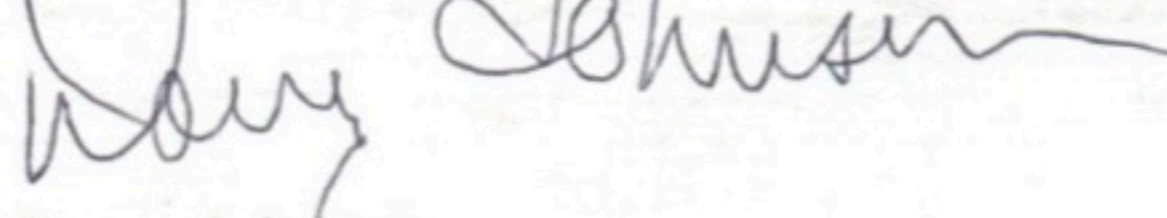

KKOJ is a new 5000 watt daytime station, signing on the air for the very first time July 10, 1980, at 12:02 PM.

KKOJ is a north-south directional station, our coverage area goes north to Willmar Minnesota, and south down past Sioux City. Our east-west signal is approximately 80 miles wide.

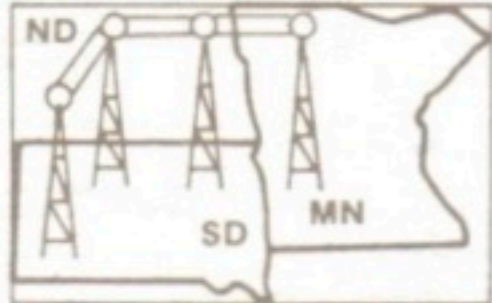

Hoping this will be of some help to you.

Thank you for your kind words about KKOJ.

Sincerely,

Doug Johnson
KKOJ General Manager
