

May 29, 1980

Mr. John N. Sampson
1714 South 84th Street
Omaha, NE 68124

Dear John:

Thank you for writing KKRC.

Consider this a verification that you did indeed receive our station on Sunday morning, May 18, 1980 just prior to beginning our regular Sunday morning public service broadcasting. Steve McCartney has read your letter and also confirms the verification.

It is unusual to receive stations on 1230 KHz from that distance because at that frequency the FCC limits daytime power to 1000 watts and nighttime power to 250 watts.

The balloon race (hot air balloons) was cancelled due to high winds in the area.

Yours respectfully,

Jim Collis
KKRC Chief Engineer
