

KLGA

NORTHERN IOWA'S FARM AND FAMILY RADIO STATION

5000 WATTS 1600 KC • ALGONA, IOWA • PHONE 876

September 23, 1957

Mr. John N. Sampson
7940 Pacific
Omaha 3, Nebraska

Dear Mr. Sampson:

Please excuse the delay in replying to your reception report, not that it isn't correct, just that we've been terribly busy.

Please treat this letter as a verification of your reception of KLGA in Omaha on September 10, 1957.

KLGA is a 5kw two tower directional daytimer, we beam our signal 30 degrees west of true north, however, we do not have anyone to protect to the Southwest, therefore we allow our signal to slop down your way.

Thanz for your interest.

Yours,

James J. Wychor
General Manager & Chf. Eng.
