

KLIC

950 KC

5000 WATTS

5000 WATTS COVERING THE STATE FROM CENTRAL MISSOURI

JEFFERSON CITY, MO.

July 6, 1954

Mr. John Sampson
7940 Pacific
Omaha, Nebraska

Dear Sir:

This is a verification of your reception of K L I K on July 4.

K L I K is a new station. We took the air on March 3, 1954. We have a custom built transmitter, designed and built by Fritz Bauer of Springfield, Missouri. The transmitter, which is remotely controlled, is located six miles west of Jefferson City on the ten mile drive. We use a shunt fed antenna 243 feet high.

Our studios are located at 410 East Capitol. All our studio equipment, except remote gear, is Gates. The remote equipment was designed by Paul Schaffer.

Thank you for your letter. Hope you'll hear us again sometime.

Sincerely,

John Halligan
Chief Engineer
