Dear Sir:

This is in reply to your letter received this date here at KMHL in Marshall. Thank you very much for your letter of May 10, 1954. We have here at KMHL a Raytheon model RA 250 which is a 250 watt transmitter with a Raytheon console and limiter operating on 1400 KCS. We use General Radio monitoring equipment. We operate from 6:00 am to 12:00 pm daily. Kmhl has been on the air since 1946 and was the third station built in the Linder group. The Linder group is now building a new Station at Redwood Falls, Minnesota. We are very satisfied with our transmitter and have had a minimum of trouble.

Thanks again for your letter and we appreciate your trouble of taking time to write us here at KMHL.

Yours Truly

*Gordon Hakeman*Gordon Hakeman  
Chief Engineer KMHL
