TELEPHONE 860 OSCEOLA, ARKANSAS
 Stuttgart, Arkansas,
 January 2nd, 1956.

Mr. John Sampson
 7940 Pacific
 Omaha 6, Nebraska.

Dear John:-

Thanks for the fine report of reception of our Special DX Test for the National Radio Club. We have checked this with our Master Log for the program, and are happy to verify your reception of Station KOSE, Osceola, Arkansas, December 20th, 1955, from 2:03 to 2:22 a.m. Central Standard Time on 860 kc/s. We really were glad to know you were able to log us so well, even if you did have to borrow pencils, matches, etc. Hi.

Jimmy and I really got a big kick out of doing the Show, and we hope you and Marv enjoyed it. Maurice made it home in time to listen from 2:25. So far we have received 36 reports. Most of them indicated that the reception was good in the East, but fair to poor in the West. We had a reading of S/9 plus 25 db from Penna.

KOSE operates daytime only with 1000 watts and a non-directional antenna. Our assigned frequency is 860.

Thanks again for the report. Tell Marv I'll get the veries for him and Phil to them as soon as I can get the information they requested.

Good DXing, and best wishes.

Cordially,
Scooter
