GENERAL MANAGER

Dec. 13, 1954

Mr. John Sampson -

Dear Sir:

Thank you for your letter of the 9 in which you told of hearing our station at your location.

We are glad to get letters of persons hearing our station at such distance. We conduct our frequency measurements each second Thursday morning of the month.

I am the person you heard giving the station identification. We use tone modulation and give station identification each five minutes.

The station uses Gates transmitting equipment and the antenna is a 185' vertical and have an output of 250 watts.

Again thanking you very much for your report, I remain

Very truly yours

Harold L. Duncan
