Omaha, Nebraska

Dear Sir:

This is to acknowledge receipt of your report of reception of the test broadcast from Radio KVLV, April 2, 1958, at 12:08 $\frac{1}{2}$ AM to 12:14 AM, Pacific Standard Time.

Your report is verified as correct and there is no doubt that the reception was good, as the accuracy of your report indicated 100%.

Our transmitter is a Gates BC-1J, feeding a 215 foot steel tower (series fed) through 196 feet of RG17U coax cable. The tower is top loaded with three false guy wires fastened right at the top of the tower and the first 30 feet of each guy radiates.

We have also been heard in Aukland, New Zealand at 6:40 AM, Pacific Standard Time, which is about as good DX as we will ever get. Our best in the states is Burlington, Vermont, so far.

Thanks again for the report. Our regular test schedules now will be midnight to 12:15 AM, each fourth Wednesday of each month.

Very truly yours,

Lester W. Pearce
Lester W. Pearce,
Co-owner, Chief Engineer,
Radio KVLV
