Mr. John N. Sampson
7940 Pacific
Omaha 3, Nebraska

Dear Mr. Sampson:

Thank you for your DX report of January 6th, reporting reception of our KWK radio signal. We have checked our logs and wish to verify your report.

For your information KWK operates with 5,000 watts power, non-directional until local sunset daily, at which time we shift to a directional pattern which resembles a figure eight, with the principal radiation lobe to the north. Our transmitter is a 5 KW RCA unit, which is located near the northern city limits of St. Louis, and approximately one-half mile from the Mississippi River.

Again thanking you for your interest, I remain

Sincerely yours,

Secretary to
N. J. Zehr, Chief Engineer
