Dear Mr. Sampson

Thank you for your reception reports of our radio test, which was conducted on May 5, 1980 for the National Radio Club. I found all the reports to be very interesting and am glad that the test was aired.

The equipment here at KWOA, 730 KHz, consists of a Harris MW 1A A.M. transmitter, which is series fed to a 583 foot tower. Our elevation is about 1470 feet above sea level. It was good to see that 1 kilowatt will still propagate for good DX.

I have included some other information about our station, as well as other momentos. Further inquiries to the station will be replied. Thanks again for the report.

Martin D. Petersen
