Dear John;

We were glad to hear of some of the fine reports from your area of the country during our Equipment Tests, I hope That I can give you a confirmation on KWPR, We did make a test at the hours you specified on the Jan,6th with Music (No TONE) and We hope this will confirm it for you as to the musical selections no ones knows now what we played as only the Engineers were at the studio that nite and were Adj. the Modulation and were playing random music. We had a few reports of a tone on 1270 that nite but we did not send Tone signals at any nite time hour.

Thank you for the report from
Omaha. Yours;

Paul Gentry

Ch. Eng.
