Dear John:

K XL F
BUTTE

This is to confirm your reception of our broadcast for frequency check from 1:45-2AM MST, Jan 17, 1955.

K XL L
MISSOULA

We are a 250 watt station and the NBC representative in Helena. The only other station is Mutual. We have an unlimited license, but only operate normally on the air from six AM to Midnite, 8AM to 11PM Sundays. Our transmitter is RCA Model 250-G. It is sixteen or so years old but still gives good service. Antenna is a self-supporting tower 160' high fed by about 200' of Co-ax.

GREAT FALLS

K XL Q
BOZEMAN

Regarding our programming, we run a large number of the NBC programs of course, and we have perhaps an abnormally high number of newscasts, but the people here seem to go for it. As a member of the Montana Z bar (Z) network we receive quite a few programs from other stations in the network, and we originate a few too. Also there are various other local pgms that we run too. I hope that helps answer your question.
