

SERVING OVER 500,000 TEXANS
MAILING ADDRESS: WEATHERFORD, TEXAS

January 8, 1958

Mr. John Sampson
7490 Pacific
Omaha, Nebraska

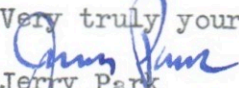

Dear Mr. Sampson:

We greatly appreciate your letter telling us that KZ was heard in Omaha.

Your logging of KZ on December 31, 1957 is correct.

KZEE operates as a 250-Watt, non-directional station on a frequency of 1220 kilocycles. We utilize a 212 foot non-directional antenna; uniform cross-section guyed, series-excited, vertical steel tower. Our transmitter is RCA, type BTA-250L.

Thank you for your interest in KZ. Come down and see our award winning coon dogs sometime!

Very truly yours,

Jerry Park
Program Director
