Dear Sir:

Many thanks for taking the time to let us know that we occasionally have a listener in Nebraska. That's a long way from home and it keeps renewing our confidence in the ability of our signal to reach out.

The information that you have logged is correct to the last detail. Sorry that the signal faded so soon. We share the frequency with other stations so that is bound to exist.

WAIT is one of the better known stations in the Chicagoland area. While we are only 5000 watts, we need apologize to nobody for our signal. We cover the area very thoroughly. If you are ever in the vicinity feel free to drop in and visit our new studios at 188 W. Randolph st in Chicago. Once again, Many thanks for writing

Sincerely

Harry Berg
