"The Friendly Voice of the Iron Range"

EVELETH, MINNESOTA

November 4, 1957

Mr. John Sampson  
Carleton College  
Northfield, Minnesota

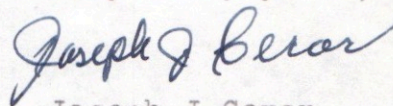

Dear Sir:

Regret that your request for verification of reception had not reached the engineering department. We are indeed happy to hear from any DX fan or Club Member of their reception of our signal wherever it may be heard.

It is with pleasure that I write you at this time to confirm our being on the air at the time you specify: December 26, 1955, frequency check period 1:00 to 1:30 AM CST. As you know the use of the 1,000 cycle note enables our measuring agent to hear and identify us through anyone else that may be on at the time.

We sincerely appreciate your report and any others that we may receive in the future. Our frequency test schedule remains: the last Monday of each month from 1:00 to 1:30AM CAST.

Very truly yours,

Joseph J Cerar  
Chief Engineer WEVE
