Mr. John Sampson  
7940 Pacific  
Omaha, Neb.

Dear Mr. Sampson:

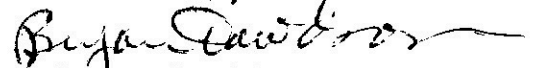

I am pleased to verify your reception of WJBD the morning of July 8, 1958. We were on the air that morning to conduct "proof of performance" runs on our equipment. The information you sent me is in agreement with our logs of that date- proving that you definitely heard WJBD.

We operate with 500 watts, non directional, on 1350 KC. Our antenna is one of the shortest in the whole industry-- just 110 feet tall.

Thank you for your report. I am happy to verify your reception.

BD/veu

Sincerely,

Bryan Davidson  
General Manager
