Dear Sir,

Received your letter the 6th of January, 1958.  
Excuse the delay in answering it. From your letter I  
see that you have tried quite a few times for acknow-  
ledgement. I hope this added delay hasn't caused you  
to give up hope. HA!

I have only been here a couple of months and still  
am trying to get situated. Plan on getting a set schedule  
for Equipment Tests pretty soon. If you are interested  
I'd be glad to let you <sup>know</sup> the day and time.

The transmitter and audio equipment are all Collins.  
We operate with 500 watts of power at as you know 1600  
kc's.

Thanking you for your letter and sorry for the delays.  
What you logged on our Equip. Test was correct.

Sincerely,

*Richard A. Riley*
