*July 17, 1957*

Dear Sir:

Thanks for your QSL. Your report was correct.

WMFS is a daytime kilo-watt, programming to the Negro population of the Tri-State area: Tennessee, Georgia, and Alabama.

Our transmitter is a Collins 20V. The antenna is a Truscon self-supporting steel tower, 208 feet high, located at 3525 Ohls Avenue.

The studios are at: 835 McCallie Avenue, here in Chattanooga. The transmitter is remote controlled. Thanks again for the QSL and much more good listening in the future.

Yours truly,

*G.E. Channells*
