

April 17, 1954

WMIX
Mount Vernon
Illinois

Dear Sirs

From 12:55 A. M. to 1:05 A. M. (CST) on April 17, I heard station WMIX in Mount Vernon, Illinois, testing on 940 kc. The signal was very faint at 12:55, but it became strong at 1:00. It grew gradually fainter and was inaudible by 1:05. There was some station interference and this made it quite difficult to hear the announcements.

I live in Omaha, Nebraska, and am using a Hallicrafters S-53A receiver with headphones and a doublet antenna.

A verification would be appreciated.

Yours truly

John Sampson
