

NEW HORIZONS FOR *Galesburg* HUB OF WESTERN ILLINOIS

January 10, 1958

Mr. John Sampson
7940 Pacific
Omaha, Nebraska

Dear Mr. Sampson:

Thank you very much for your interest in WQUB and your report of reception of our station. We certainly must have been doing well to override stations on the same frequency and much closer to you.

WQUB is a 5000 watt regional station, and one of main radiation lobes is in your general direction.

You did unusually well in getting the names correctly. Mr. Flambo's name is not only correct, but is correctly spelled. P.J. (Paul Joseph) Denault is rather unusual, so I think you did very well to guess his name so closely.

We leave the air at local sunset, and 4:30 P. M. is the hour for December, so we can verify that we signed off on December 26, 1957 at that hour.

We thank you again for your interest.

Very truly yours,

D. H. Horner
