Pure Gold 94

KBRE AM

Mr. John Simpson:

This letter will confirm your reception report of 1/15/98, thank you for your report. Here are a few details concerning our operation. KBRE is a 10 KW non-directional daytime station at 940 kHz. We began broadcasting in June of 1971. KBRE is owned and operated by Kolob Broadcast Radio Enterprises of Cedar City, Utah.

Our transmitter is a Harris BC-10H feeding a single tower through a Harris Antenna Tuner. Tower height is 246'. Audio is received over a Microwave Link and processed by an Orban Optimod prior to being sent to the transmitter. A Harris BC-1H is operated as an Auxiliary/Standby Transmitter. Our studio and office are located 8 miles south of the transmitter.

Again, thank you for your report.
