

## CONFIRMATION OF RECEPTION

Mr. John Sampson  
22502 N. Hermosillo Dr.  
Sun City, Az 85375

Dear Mr. Sampson

This letter shall serve as confirmation of reception of a special test transmission of KDSX Radio Station on a frequency of 1700 kHz on May 2, 1998 from 9:36 PM to 10:21 PM Central Daylight Time. Power utilized was approximately 750 watts into a .48 wavelength vertical radiator located at the transmitter site of KDSX 950 kHz-Denison/Sherman Texas.

I am pleased that you participated in this test. It is likely to be the last transmission from the 950 site; the original intent of the tests was to determine ground conductivity (during daytime hours) for a relocation of the 1700 site to a point south. It is anticipated that the new site will be operating sometime during early 1999 as a fill-in signal for 1310-KTCK Dallas ("The Ticket").

Most sincerely,  
*Hubert Beavers*  
Hubert (Hue) Beavers  
Chief Operator KPLX-KLIF Dallas
