From: Frank Luna, Chief Engineer  
KEVT Radio, 1030 AM  
1316 E. Broadway Blvd.  
Tucson, AZ 85719

Dear Mr. & Mrs. Sampson,

First and foremost, on behalf of the entire staff and management, Thank You very much for the most recent letter to our radio station regarding reception.

Ever since I've assumed responsibilities as Chief Engineer for KEVT Radio, we have been receiving "letters of reception" from other listeners in various parts of the southwest portion of the United States, as well as parts of Northern Mexico! This is due to the purchase of a more state of the art AM TRANSMITTER and re-tuning of our antenna system.

Also, for your information, another listener who wrote us (Mr. Bill Nittler from Mancos, Colorado) has a "Drake" receiver... his is the "R8A" model, using a 125 foot long wire antenna, whereas you are using the "R8B" model. My compliments!!

So that you know what we are using "signal" wise, KEVT Radio utilizes a "Broadcast Electronics" Model 10 A, 10,000 Watt transmitter, with a four tower array and major signal lobes to the North and Northeast and to the South and Southwest. Our signal (as of this writing) gets as far south as Hermosillo, Son., Mexico!

171

KEVT Radio, 1030 AM is officially licensed to Cortaro, AZ (a very small town near Marana) and is considered the most listened to Spanish language station in Southern Arizona and Northern Sonora, Mexico, with a unique blend of regional Mexican music and programming.

With that said, here is your official letter, confirming reception of our signal... KEVT 1030 AM, Cortaro-Tucson... "LA MAS PERRONA!" ("La Mas Perrona" translates to the best station around in Spanish slang). Once again, THANK YOU for your letter to us.

Sincerely,

Frank Luna, Chief Engineer  
KEVT Radio, 1030 AM
