Dear Mr. Sampson:

This note is to confirm your letter of reception of radio station in Phoenix at 1510khz, call letters KFNN.

It's not surprising you've received our transmission "quite strong during the day."

We upgraded our transmitter from 10,000 watts to 22,000 watts, and moved our transmitter from Mesa to Northeast Phoenix.

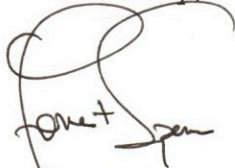

You should be, also, able to hear the station at night. We are conducting night-time transmissions at 100 watts with a broadcast lobe covering your area of the Valley.

This will confirm your reception of KFNN on January 18, 1997.

Hope your enjoy some of our programming and tell your friends about us.

Thank you again, and I remain--

Sincerely,

Forrest Spencer
Operations Director
