John N. Sampson  
22502 North Hermosillo Drive  
Sun City West, Arizona 85375

Dear John N. Sampson:

I am sorry you did not receive a response from your first letter. We were involved in moving our studios last fall, and it must have been lost in the shuffle.

This will confirm your reception of KHTK on November 3, 1996 at 10:18 PM, PST. KHTK is operated on 1140 khz, with an output power of 50,000 watts. The antenna system is a five-tower array, directional day, and night. The transmitter is located in Wilton, California, approximately 30 miles south-east of Sacramento.

We often receive letters such as yours from listeners all over the world. It is always nice to hear how well our signal is travelling. Thank you for your interest in KHTK, and hope you will enjoy the enclosed stickers.

Sincerely,

A handwritten signature in cursive script that reads "Matt Greer".

Matt Greer  
Asst. Chief Engineer  
KHTK-AM
