Dear John,

Hello, and thanks for writing! We were very excited to hear that you received our signal in the Phoenix Area. We haven't had anyone from the Southwest write to us in quite a while. Most recently we received a letterhead request from a gentleman in Norway. Evidently he was able to pick us up several times within a two-week period, and sometimes the signal was quite strong. I'm thinking he was using some pretty hefty equipment.

Our call letters are AM 930 KSEI, and our city of license is Pocatello, Idaho. We have a simulcast sister station, AM 1230 KRXX, and the city of license for it is Rexburg, Idaho.

Our transmitter is located in Pocatello, Idaho with at latitude 42.57.44.7N longitude 112.29.50.9W. The ground elevation is 4460 feet above sea level and the tower height is 256 ft, making the overall height 4716 feet above mean sea level.

Thanks again for taking the time to write. It is always a pleasure to find out we are being heard throughout the nation and around the world.

Sincerely,

Don Craig

Program Director AM 930-KSEI
