Los Angeles, CA. 90016

Mr. John M. Sampson  
22502 N. Herosillo Drive  
Sun City West, AZ. 85375

Dear Mr. Sampson:

Thanks you for your recent reception report of Station KSPN, Pasadena. I have checked the detail you provided against our Program Log and find that you did indeed hear KSPN on:

Date: 12-7-02

Time: 0647 - 0705 PST

Frequency: 1110 kHz.

At the time of your reception, KSPN was operating with its 'daytime' directional antenna pattern, with a power output of 50 kW. I have enclosed a picture of our daytime pattern for your review.

It may interest you to know that on January 1, 2003 KSPN will change call letters to 'KDIS' and begin to program the Radio Disney children's format.

Best Regards & Good DX
