Sun City West, Arizona 85375

Dear Mr. Sampson:

I am pleased to confirm your reception of KVWM-AM on September 24, 1997 as reported in your letter.

KVWM-AM operates with a daytime power of 5,000 watts on 970 KHZ, serving Show Low and the White Mountain area since 1957.

The station on 960 in Phoenix, formerly KOOL-AM, similarly operates with a power of 5,000 watts. With your close proximity to their point of transmission, which is in the North part of the Valley, I am very pleased you were able to receive KVWM with a signal strength that was "surprisingly strong and alone on 970".

Sincerely,

A handwritten signature in cursive script, reading "Michael Woodworth".

Michael Woodworth
Chief Engineer
