Dear John:

Thanks so much for the signal report from Arizona, as you picked us up on 4/30/02. This letter will serve as confirmation.

In case you did not know our information, we are located near Monterey/Salinas, California, and have 25KW of daytime power, non-directional; and then go to 10KW at night and are directional with signal going mostly west, with lobes to the north and south up and down the coast. This station signed on the air for the first time last year, and we have been so well received with our "oldies format" here in the area. We have been picked up in many distant areas including Washington state, Nevada and have regular listeners in southern California. The Drake receiver is a great one. Being a ham radio operator, I am familiar with the Drake gear. I do a little HF from time to time, and know the excitement of making a distant contact. Thanks for listening, and if you are ever in the area, please look us up. Thanks again.

Sincerely,

A handwritten signature in black ink that reads 'Don Murray'.
