I was very pleased to receive your reception report dated Sept 21, 1970. It was of much interest to me.

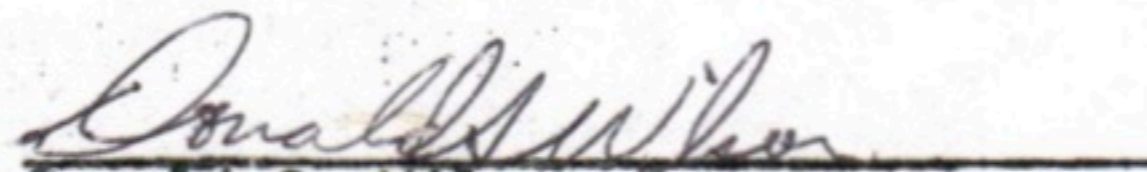

KUDL operates at 5000 watts daytime-directional reverting to 500 watts at night. A map of our daytime pattern is enclosed. We are licensed to Fairway, Kansas, a suburb of Kansas City. Our studios and transmitter are located near Lenexa, Kansas. Might I at this time invite you to visit us should you ever get to Kansas City.

When your reception of KUDL was made, we were operating at 5000-~~500~~ watts. We were conducting ~~normal programming~~ equipment tests.

Listed at the bottom of this letter is a list of our sister stations. Also included in our chain is KEIR-FM, Dallas, WCYB-TV, Bristol, Tennessee, and pending approval by F.C.C. is WCAM in the Philadelphia-Camden, New Jersey market.

Once again, thank you for the reception report.

Sincerely,

Donald S. Wilson
Chief Engineer
KUDL AM-FM
