WADA — SHELBY
WGAS — GASTONIA
WHIT — NEW BERN

Dear Mr. Sampson,

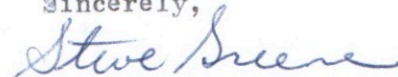

This letter is to verify your letter of March 26, 1969 concerning reception of WADA on that date from 3:55 PM to 4:00 PM. Details of program mentioned in your log are correct for that period.

WADA operates on 1390 kcs with a power output of 1,000 watts during the day and 500 watts with a four tower directional antenna at night. Programming is from 5:00 AM to 12:00 midnight. The transmitter is an RCA BTA-1MX and is approximately 10 years old. Glad to hear it's still getting out.

Thank you for your letter.
