

Mr. Sampson.....

We are pleased and delighted to verify that your reception report on WCPK on the morning of March 9, 1970 is 100% correct.

As a result of this equipment test, response has been fantastic..ranging from upstate New York to Tampa, Florida to St Louis, Missouri...to Green Bay, Wisconsin and states in-between. I am delighted to hear that our little rig was riding in strong in Winston-Salem.

For your information, WCPK operates daytime only with 1,000 watts. Xmtr is Gates BC 1 G. Single vertical radiator is only 122 feet high.

Thanks again for your definitive and concise reception report.

Cordially,

Charles F. Payne  
Owner/President
