Country-wide One in Dynamic Danville, Virginia

APRIL, 3, 1969

Dear John;

Confirming your reception of WDVA March 31. Looks as if you receive us pretty well.

We operate on 1250 Kc, 5000 watts, 24 hours a day. The reason you lose us at night, we go directional, with our major lobe toward the east, South Boston.

Wish we were non-directional all the time, but that's dreaming.

Good to hear from you.

I had a report from a DX'er in Ontario, recently, and he ask for a special program for DX'ers, which I plan to do in the near future.

According to him, all DX'ers of your particular club will be notified.

Thanks again,

William C. Campbell, C.E.
