Oct.24,1968.

Hi John;

This is to verify your report on receiving our signal on Sunday Oct.20,1968 from 2:40 pm to 2:55 pm EDT. Your report agrees with our log for that day. It is good to know that the signal is getting out.

The transmitter is an RCA BTA-5F using a single 892*^R in the final power amplifier. We are non directional 5 Kw Daytime, and 1 Kw on Directional pattern at night, our night pattern being almost in a bow tie pattern east and west .

Thanks for your report and the best regards to you.

John R. Dickerson
