Winston-Salem, N.C.

Dear John,

I was very pleased to receive the report on reception of our station in Winston-Salem. In checking our program log for Sunday everything you said was accurate. At that particular time of the day our weather conditions here was partly cloudy skies, heavy dew and temperature at 74 degrees, if this is any help to you. Our station operates at 5,000 watts daytime only, and our tower sets in a marshy area. once again very glad to have this report from you.

Yours truly

Dick Smith  
News Director
