LLOYD WHITE
PRESIDENT AND GENERAL MANAGER

June 29, 1971

Dear Mr. Sampson,

This is to confirm your reception of our 'sign on' on August 18, 1970.

You already know many of our statistics but possibly you would like to know that we get our signal from a Collins 20-V 1,000watt transmitter through a 187ft. base fed, guyed tower.

I am sorry that it took me so long to reply to your letter. I do not remember receiving your first letter. I am impressed with your through methods and dedication to your hobby. Good luck in the future.

Yours truly,

W. Lynn Crabbe
Chief Eng.
